

# Special Features for “CFRP / CFRTTP”

※As of Oct. 18, 2018. In random order. Exhibitors and products may differ from the actual ones at the show.

## Carbon Fiber Composites

The optimum combination of fibers and resin provides zero-CTE, high modulus, high thermal conductivity, etc.

JXTG NIPPON OIL & ENERGY CO.

## CFRTP

It is possible to re-shape, it can be crushed, pelletized and reused as a material for injection molding.

TIPCOMPOSITE CO., LTD.

## Flexcarbon

Complex modeling very first in molding isotropic & strong smooth surface. Flexcarbon is an isotropic CFRTP stampable sheet.

SUNCORONA ODA CO., LTD.

## Carbon Fiber

Converted standard carbon fiber into high-strength & modulus carbon fiber by the patented technology.

WESTERN JAPAN TRADING CO., LTD.

## CFRP

Composite material which is light weight, high strength and high rigidity.

ACM INC.

## Carbon Prepreg

Various kinds of prepreg such as epoxy, phenol are available. Minimum lot is 50 m.

NIPPON RESIBON CORP.

## Kyron Max

High strength plastic compound for injection molding.

WEST ONE CORPORATION

トップファイン®CF製スピーカーカバー

トップファイン®CF製スピーカー振動板

## Topfine CF

For sound use. CFRP material superior in workability. Sound comparison demonstrations available in the booth.

TORAY PLASTICS PRECISION CO., LTD

## CFRP

It can be used for trial products and small-lot production. Various forming methods are acceptable.

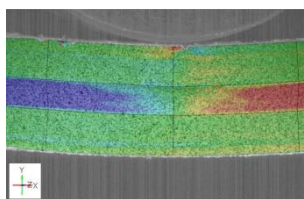

YAMATO JUSHI CO., LTD.

## CFRP Special Tool

It is used PVD process to create an ultra-thin coating which guarantees cutting blade sharpness.

WU CARBIDE CORP.

## CFRP Characterization Technology

Strain distribution analysis for surface of lamination plate.

JFE TECHNO-RESEARCH CORPORATION

## Patent molding technology of CFRTP

High cycle heat and cool molding method.

ASAI EXTRUSION MOLDING

And more related products available at the show!
