

Special Features for “Laser Processing/Joining”

※As of Oct. 18, 2018. In random order. Exhibitors and products may differ from the actual ones at the show.

AUTOMOTIVE DISPLAY

3D laser processing of curved glass

By combining the original laser processing technology and robot arm, various curved glass processing available.

MITSUBOSHI DIAMOND INDUSTRIAL CO., LTD.

Ultrasonic Complex Vibration Welder

By elliptical vibration, our machine is able to weld various materials stably in a short period of time.

CHIYODA TRADING CORP.

Laser System

Laser spot welding equipment for aluminum welding and continuous fillet welding.

MATSUMOTO KIKAI CO., LTD.

Laser Micromachining System

Laser micromachining technology opens up the possibility of advanced fields.

NIPPON SHARYO LTD.

Compact Ultrasonic Metal Bonder

Ultrasonic bonding machine which controls process highly.

DWELDS CORPORATION

Portable Battery Welding Machine

It can start a work with only 1 hour charge at a site where difficult to secure a power supply.

IKURA SEIKI CO., LTD.

High-Power Industrial Laser Solutions

Possible to use for metal/non-metal cutting, cladding, and heat treatment, etc.

COHERENT JAPAN, INC.

Afclair Scan Ultra

New laser system using ultra short pulse laser.

AFLAIR INC.

Laser Machine for Welding Transparent Resin

Possible to weld transparent plastic without absorbents or solvent welding.

SUZUKI ELECTRIC IND. CO., LTD.

High Power Fiber Laser

Ultra Compact Size High Power Laser.

IPG PHOTONICS JAPAN LTD.

TruDisk

High-power solid-state laser for the welding, cutting, and surface processing of metals.

TRUMPF CORP.

Litz Wires Lead/Plate Welding Robot

The contact resistance can be greatly reduced.

NAGSYSTEM CO., LTD.

And more related products available at the show!
