

Special Features for “Innovative Material for Machine Component”

※As of Oct. 18, 2018. In random order. Exhibitors and products may differ from the actual ones at the show.

Temperature Resistance Composite Alloy

TRC alloy has high temperature resistance comparable to the engineering ceramic.

READ CO., LTD.

Carbon Fiber Composites

The optimum combination of fibers and resin provides zero-CTE, high modulus, high thermal conductivity, etc.

JXTG NIPPON OIL & ENERGY CO.

Kyron Max

High strength plastic compound for injection molding.

WEST ONE CORPORATION

Large and Complex Shape Ceramic Parts

It's possible to implement large ceramic parts.

MIYAGAWA KASEI INDUSTRY CO., LTD.

Weldless Molding of Metallic Colored Resin

High luminance. Mold design & Resin molding, technology.

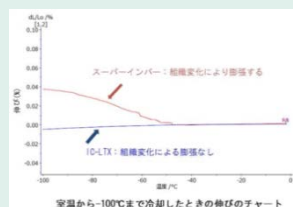

ASAHI ELECTRIC CO., LTD.

NATOCO SELF-HEALING TM CLEAR

Soft and Strong Paint. Not only repairing scratches, it also has high extensibility and resistance to abrasions.

NATOCO CO.,LTD

Zero Expansion Alloy at Extreme Cold

Zero Expansion Alloy even up to -100C.

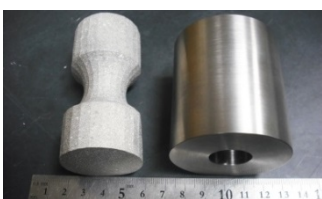

SHINHOKOKU STEEL

High Quality Wire and Bar Products

High quality Ni&Co based alloy wire.

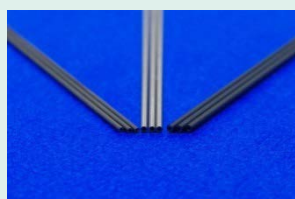

TOKUSHU KINZOKU EXCEL CO.,LTD.

Near Net Shape High Functional Titanium Alloy Products

Manufacturing near-net-shape titanium alloy products having high-functional properties, utilizing HDH titanium powders.

TOHO TITANIUM CO., LTD.

Titanium Micro Tube

Titanium tube with phenomenal straightness and dimensional accuracy.

NIPPON TOKUSHUKAN MFG. CO., LTD.

Thermoplastic Polyimide (Therplim)

It has both of high-strength, heat durability, excellent chemical resistance and easy formability.

MITSUBISHI GAS CHEMICAL COMPANY INC.

BN Products

High thermal conductivity, electrical insulation and hard to get wet with molten metal.

SANWA MATERIALS CO., LTD.

And more related products available at the show!
