

Special Features for “Advanced Material for Automobile”

※As of April 15, 2019. In random order. Exhibitors and products may differ from the actual ones at the show.

Kyron MAX

[New Product/Technology]
 High strength plastic compound for injection molding. Demonstration will be available in the booth.

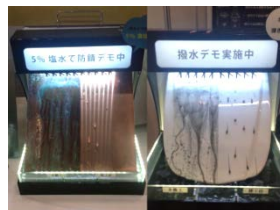

WEST ONE CORPORATION

Metal Face

World's first! Metal interface resin material that transmits light and radio waves.

GIKODO

Inorganic Glass Coating

Multi-functional Inorganic coating protect surface from oxidation & fading.

CRYSTAL PROCESS CO., LTD.

High Heat and Scratch Resistance Altuglas

Highest heat and scratch resistance of all PMMA.

ARKEMA K.K.

Copper and Silver Alloy

It has high strength, high conductivity, and bending resistance. Ultrafine processing is also possible.

SHOWA CABLE SYSTEM CO., LTD.

Non-woven Fabrics: Hemp Flax

Combination w/polymers, create strong, durable, light-weight automotive parts.

HORIMASA CO., LTD.

Heat Resistant Silica Fiber: BELCOTEX

It is heat resistant silica fiber developed in Germany.

IMAE INDUSTRIES LTD.

Electrolytic Iron

Products made using high-purity iron offer a wide range of advantages, including resistance to impact, heat and corrosion, as well as magnetic characteristics.

TOHO ZINC CO., LTD.

Huafon TPU Non Yellowish Aliphatic Grade

This series are suitable for a wide range of applications including protective films and electrical parts.

NOMURA TRADING CO., LTD.

SUS316 Blind Rivet

[New Product/Technology]
 High corrosion resistance. 60% stainless, light and eco-friendly. Suitable for medical and food fields.

LOBTEX FASTENING SYSTEM CO., LTD.

Composite Materials: UENO TECROS

TECROS are new composite materials composed of LCP and other polymers.

UENO FINE CHEMICALS INDUSTRY, LTD.

Structural Ceramics

Structural Ceramics, Alumina, Zirconia, Steatite. It has high corrosion resistance and high Insulation, suitable for medical devices.

X-ONE TECHNOLOGIES CO., LTD.

And more related products available at the show!
