

Special Features for “Functional Material for Electronic Device”

※As of April 15, 2019. In random order. Exhibitors and products may differ from the actual ones at the show.

NANO ACE

NANO ACE is fine particle products of talc. This is the only one in the world.

NIPPON TALC CO.,LTD.

Highly Conductive Al Textiles

[New Product/Technology]
Highly conductive Al textiles for flexible and wearable electronics.

KOREA INSTITUTE OF MATERIALS SCIENCE (KIMS)

UENO LCP

I can be used for electronic components, micro connectors, motor parts, etc.

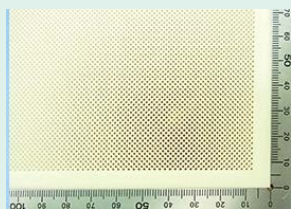

UENO FINE CHEMICALS INDUSTRY,LTD.

Processing Services

[New Product/Technology]
Processing services for electronic and optical parts materials.

CERATECH JAPAN CO., LTD.

Fine Ceramics

Various forms can be manufactured by special molding technology.

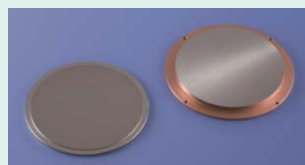

IMAE INDUSTRIES LTD.

Copper and Silver Alloy

It has high strength, high conductivity, and bending resistance. Ultrafine processing is also possible.

SHOWA CABLE SYSTEM CO., LTD.

Sputtering Target

We will provide metals, alloys and ceramics in the desired composition and shape.

KOJUNDO CHEMICAL LABORATORY CO., LTD.

Semco Packaging & Application Systems

Injection molding of plastic industrial cartridges and syringes for the storage and transfer of chemicals.

PPG JAPAN LTD.

Atomization Equipment: NanoVater

[New Product/Technology]
Emulsion variance dispersion. It can be used for display, Cathode material for Secondary battery, etc.

YOSHIDAKIKAI

Cleaning System: QuickSnow

[New Product/Technology]
QuickSnow is cleaning system with dry process for micron size particle.

AIR WATER INC.

Dispensing Machine: REVO MILL

[New Product/Technology]
Wet continuous dispersing machine capable of ultra soft dispersion to hard dispersion.

ASADA IRONWORKS

Evaluation of the Physical Properties

Evaluation of the physical properties under various measurement conditions.

MITSUI CHEMICAL ANALYSIS & CONSULTING SERVICE INC.

And more related products available at the show!
